Fisheries (Seabird Sustainability Measures—Bottom Longlines) Notice 2008 (No. F430)

Pursuant to section 11 of the Fisheries Act 1996, the Minister of Fisheries gives the following notice.

Notice

- 1. Title**—This notice is the Fisheries (Seabird Sustainability Measures—Bottom Longlines) Notice 2008.
- 2. Commencement**—This notice comes into force 28 days after the date of its notification in the *New Zealand Gazette*.
- 3. Interpretation**—In this notice, unless the context otherwise requires:
 - “Act” means the Fisheries Act 1996;
 - “aerial extent” means the section of the streamer line backbone running from the vessel stern, to where the backbone of the streamer line enters the water;
 - “bottom longline” means a line to which 7 or more hooks (whether baited or not) are attached, and is sunk using weights also attached;
 - “hauling” means the period from when line retrieval commences to when the longline is completely onboard;
 - “nautical dawn” means the time at sunrise when the centre of the sun is at a depression angle of 12 degrees below the ideal horizon for the location of fishing;
 - “nautical dusk” means the time at sunset when the centre of the sun is at a depression angle of 12 degrees below the ideal horizon for the location of fishing;
 - “offal” means solid fish parts, including heads, guts, frames, tails, tentacles and fish trimmings, or parts thereof including minced parts; and
 - “set”, in relation to a bottom longline, means releasing the bottom longline into the water.
- 4. Streamer line required**—A commercial fisher using bottom longlines as a method of fishing must:
 - (a) carry a streamer line on board the vessel used by the commercial fisher; and
 - (b) permit inspection of the streamer line at any reasonable time by a fisheries officer or an observer appointed under section 223(2) of the Act.
- 5. Use of streamer line during setting of bottom longlines**—During the setting of bottom longlines, the streamer line must be used in accordance with clause 6 of this notice.
- 6. Streamer line specifications**—(1) The streamer line must meet the following specifications:
 - (a) The streamer line must be attached to the vessel so that when deployed the baits are protected by the streamer line, even in cross wind;
 - (b) the streamer line must be a minimum of 150 metres in length;
 - (c) the streamer line must achieve a minimum aerial extent of 50 metres;
 - (d) streamers must be brightly coloured;
 - (e) streamers must be spaced at a maximum of 5 metres apart, beginning not more than 5 metres from the stern of the vessel and extending thereafter along the aerial extent of the line;
 - (f) when deployed, each of the streamers must reach the sea surface in the absence of wind and swell. Streamer length will therefore vary depending on the height of their attachment point above the water; and
 - (g) the streamer line must be suspended from a point on the vessel at least 5 metres above the water in the absence of swell.(2) The specifications in subclause (1) do not apply to additional or secondary seabird scaring devices fishers may choose to use (such as a second tori or streamer line).
- 7. Restrictions on use of bottom longlines**—No commercial fisher may set bottom longlines to take fish, aquatic life or seaweed between the hours of 0.5 hours before nautical dawn and 0.5 hours after nautical dusk, unless line weighting is employed in accordance with clause 8 of this notice.
- 8. Line weighting**—(1) For the purposes of clause 7, lines must be:
 - (a) an integrated weighted line with a lead core of at least 50g/m; or
 - (b) when externally weighted gear is used, attach at least 4 kilograms of metal weight for every 60 metres of line.(2) Regardless of the type of line weighting used under clause 8(1):
 - (a) any rope or line used to attach weights to the hook-bearing line must not be longer than 10 metres; and
 - (b) no more than 3 floats (up to 120 millimetres in diameter) may be attached to the hook-bearing line for every 60 metres of line, unless an additional 1 kilogram weight is added to the line per additional float; and
 - (c) floats greater than 120 millimetre in diameter are not permitted to the hook bearing line.
- 9. Restriction of offal or fish discharge while setting and hauling bottom longlines**—(1) No person may discharge offal or fish during setting of bottom longlines.
 - (2) Offal or fish may be discharged during the hauling of bottom longlines provided it is discharged from the side of the vessel that is opposite to side which the hauling station is located.
 - (3) Subclause (1) does not apply to:
 - (a) fish that are legally undersize; or
 - (b) fish that are listed on the Sixth Schedule of the Fisheries Act 1996 and that are likely to survive.
- 10. The Schedule**—(1) The Schedule provides further guidelines on the design and deployment of streamer lines as seabird scaring devices.
 - (2) The Schedule is not part of the specifications.
 - (3) If there is any inconsistency between the guidelines in the Schedule and the specifications, the specifications prevail.

Seabird Scaring Device (Streamer line)*Diagram not to scale**Not all specifications illustrated*

- (i) The streamer line needs to protect baited hooks from seabirds. This means that the streamer line should be positioned in such a way that streamers are flapping in an unpredictable fashion, above the area in which the baited hooks enter the sea, so that seabirds are deterred from attempting to take bait from the hooks. In order to achieve this even during cross-winds, it is expected fishers will have to make adjustments to the configuration of the streamer line depending on the conditions.
- (ii) It is generally recognised as best practice to maximise the aerial extent of the streamer line, because this maximises the area in which the baited hooks are protected from seabirds. Best practice would be to achieve an aerial extent of 100 metres or more. In order to maximise aerial extent, it is necessary to create tension in the streamer line. This can be achieved by:
 - towing an object on the terminal end of the streamer line; or
 - towing extra length of streamer line; or
 - increasing the diameter of the in-water section of the streamer line.
- (iii) In order to be effective at scaring seabirds away from the line of baited hooks, the streamer lines should not become tangled, either with each other or with the branchline. Each streamer shall be attached to the streamer line in a manner to prevent fouling of individual streamers with the streamer line, and to ensure individual streamers reach the waterline in the absence of wind or swell. Swivels or a similar device can be placed in the streamer line in such a way as to prevent streamers being twisted around the streamer line. Each streamer may also have a swivel or other device at its attachment point to the streamer line to prevent fouling of individual streamers.
- (iv) Streamers are to be spaced at 5-metre intervals along the aerial extent of the line. The total number of streamers in use will vary depending on how the line is configured. Streamers that are hanging in the water can be prone to tangling. Because the far end of the streamer line will frequently be in the water, fishers may not wish to have streamers the whole way down the line. However, it is important that streamers are present to deter birds from taking baited hooks all along the part of the line that remains above water, as outlined in the specifications.
- (v) To ensure streamers are visible to birds, they should stand out against the surroundings. Streamers should be made of brightly coloured fluorescent plastic tubing or other material. Bright colours such as red, yellow, orange or pink are most effective during day setting. For night setting, the streamers should be of a colour that contrasts with the surroundings. Colours such as blue and green are less likely to be effective, because they are less likely to be highly visible to birds.
- (vi) A complete additional streamer line should be carried as a spare.

Dated at Wellington this 18th day of February 2008.

Electricity Governance Regulations (Exemption No. 47 (Meridian Energy Limited)) Exemption Notice 2008

Pursuant to Regulation 194(2) of the Electricity Governance Regulations 2003, the Electricity Commission ("Commission") gives the following notice.

Notice

1. Title and commencement—(1) This notice is the Electricity Governance Regulations (Exemption No. 47 (Meridian Energy Limited)) Exemption Notice 2008.

(2) This notice comes into force on 1 May 2008.

2. Exemption—Meridian Energy Limited is exempted from compliance with Rule 3.2 of Part D of the Electricity Governance Rules 2003.

3. Terms and conditions—This exemption is granted on the following conditions:

(a) It will only apply to unmetered traffic control signals on the following grid exit points:

- (i) ADD0111;
- (ii) ADD0661;
- (iii) BRY0111;
- (iv) BRY0661;
- (v) ISL0331;
- (vi) ISL0661;
- (vii) PAP0111;

- (ix) SPN0331; and
- (x) KAI0111; and

(b) the exemption will expire on 30 April 2013.

4. Reasons for granting the exemption—The reasons for granting this exemption are:

- (a) without an exemption, Meridian will incur significant expenditure and complexity in the fitting of meters to the traffic light point of connections;
- (b) traffic lights are static load and have little variation. Most changes for load are associated with changes in lamp wattage that can be accurately tracked in the distributed unmetered load database;

(c) Meridian has proposed a materially accurate method to calculate consumption for settlement;

(d) the exemption will have little or no impact on other participants and service providers and would not affect any other rules.

2. Exemption—(1) Electricity Ashburton Limited ("EAL") is exempted from compliance with the following Electricity Governance Rules 2003 ("Rules"):

Until 30 April 2008:

- (a) Rule 3.5 of Part D; and
- (b) Rule 4 of Code of Practice G1 of Schedule G8 of Part G;

From 1 May 2008:

- (a) Rule 3.7 of Part D; and
- (b) Rule 19 of Part J.

(2) Orion New Zealand Limited ("Orion") is exempted from compliance with the following Rules:

Until 30 April 2008:

- (a) Rule 5.5.2 of Section VI of Part G;

From 1 May 2008:

- (a) Rule 4.3.2 of Part J.

3. Terms and conditions—This exemption is granted on the following conditions:

(a) It shall only apply to:

- (i) the EAL embedded network connected to NSP URK0111; and

- (ii) the Orion embedded network connected via EAL embedded network connected to NSP URK0111; and

(b) the exemption will expire on 30 May 2013.

4. Reasons for granting the exemption—The reasons for granting this exemption are:

- (a) without an exemption, Orion and EAL would incur significant expenditure and complexity in the fitting of metering and communication equipment to its networks for relatively low consumption volumes;
- (b) the historical nature of the connections and impracticability of connecting strictly in accordance with the Rules;
- (c) EAL and Orion have proposed a materially accurate method to calculate consumption for settlement; and
- (d) there will be little or no impact on other participants and service providers and the proposed exemption would not affect any other rules.
